Profile

Electronics student at Politeknik Negeri Padang with skills in robotics, programming, computer vision, Linux, and embedded systems. Finalist in the 2024 Indonesian Soccer Robot Contest and 2024 IISMA awardee.

Relevant Skills

- EDA: KiCad, Eagle
- Electrical simulation: Lt spice, proteus
- Programming language: C++, Python, LabView, URScipt, Ledder logic, JavaScript.
- Atmega, ESP32 and STM32 microcontroller
- CAD: SolidWorks
- Software development: YOLO, ROS2

Achievements

- Regional Participant, Thematic Robot Contest (KRTMI), 2023
- National Finalist, Indonesian Humanoid Soccer Robot Contest (KRSBI-H), 2024
- IISMA Awardee 2024, The Hague University of Applied Sciences, Netherlands

Relevant Experiences

- Staff of PNP Humanoid Robot Team, responsible for vision and electrical systems.
- Served as Field Vice Coordinator at the Minangkabau Robot Contest 2023.
- Worked on the Automatic Bottle Unloader project with THUAS and Elkemelk using a UR-10 robot, focusing on end-effector prototyping, vision system programming, and robot integration, achieved bottle unloading from pallet to conveyor in more or lesss 10 second per bottle. Automatic Bottle Unloader
- Worked on the Epoxy Scanner project with THUAS and GKN Fokker, responsible for electrical systems and computer vision in a gantry-based mold inspection system, scanner able to detect small epoxy bead and scan entire mold surface. Epoxy Scanner

Small Projects:

- 2 Line follower robot using Arduino Nano and ATmega16.
- LabVIEW-based heater control with PID implementation.
- ±15V dual-rail linear regulated power supply using zener diodes and BJTs.
- seven-segment digital counter using a 74LS192 up/down BCD counter IC.
- Sound system built with TDA2003 audio amplifier.
- QRIS-integrated coffee machine powered by raspberry pi.
- ROS-enabled robotic arm with encoder feedback.
- DOBOT M1 palletizing system with YOLO-based oriented bounding box detection.
- Cognex In-Sight SnAPP-based OK/NG quality control integrated with conveyor system.

Internship at Infiniti Group:

- Involved in rewiring and system conversion from Lindin magnetic AGV to Casun magnetic AGV.
- Performed quality control on arriving AMRs and AGVs.
- Assisted AMR installations at PCI, Sumitomo, Astra Winteq, and Daikin.
- Assisted in deploying forklift mobile robot (FMR) at Jotun.
- Created technical specifications and conducted vision tool trials for the Zebra FS70.

Languages

English:

- CEFR Level: B2
- TOEIC Overall Score: 875
- IELTS Overall Band Score: 6.5

Indonesian :

- Native speaker

Educations

SMAN 1 Bengkulu Selatan:

- IPA

Politeknik Negeri Padang (2022-Sekarang):

- DIII Teknik Elektronika, IPK 3.35
